

## GUIDE TO WOOD FLOORING RANGE

Earth Wood and Stone have sourced Real Wood Flooring from the World's leading suppliers in Britain, Europe, America and the Far East, to provide a comprehensive range to suit every application.

From light domestic to heavy commercial to Listed Building restoration there is a wood and finish to make the project a success.

The range held in stock includes:-

- **Oak**
- **Maple**
- **Beech**
- **Birch**
- **Ash**
- **Walnut**
- **Cherry**
- **Pine**
- **Bamboo**

The list is always changing as new sources are found. All are carefully prepared and displayed in our showroom.

Most woods are available in **Solid Plank** or **Engineered** format.

### SOLID PLANKS

Solid planks are generally available in 2 grades to suit a variety of locations.

1. **Prime** – mainly knot free, no sap wood, even grain and colour.
2. **Rustic** – rustic knots, some sap wood, variation in colour and grain give maximum variation and character.

Planks are supplied **Unfinished, Finished** or **Treated**.

**ENGINEERED BOARDS**

Available as 3 strip, 2 strip and single strip boards.

Engineered multi-layered boards are available pre-finished using 5-8 coats of acrylic lacquer or wax/oil, or unfinished and ready to coat with a finish of your choice.

Engineered boards are very stable and easy to install giving a modern, uniform look whilst retaining the real wood finish, so desirable in quality installations. Particularly suitable for floating floors and in areas where underfloor heating is present. Any damage can be treated by slight sanding and application of 1-2 coats of Aquathane Super or Granglaze Satin.

Please see our sheet **GW2** for installation guide.
